

Going Above and Beyond

Focus on Your Business

Fastmetrics provides a suite of connectivity, voice, and managed services designed to help you focus on your business. We remove the distraction of poor connectivity and network trouble to give you connections that are responsive to your needs. We're your one-stop B2B provider in connectivity.

Our employees are located across the U.S. and the phone system works seamlessly. Rarely any problems, but when we do, their customer service team is responsive and always a pleasure to work with."

Gladys S., Orinda Asset Management LLC, Bay Area

HAPPY CUSTOMERS

Fastmetrics has worked with Orinda Asset Management, LLC for over six years. They are an investment company that depends on clear communication and timely collaboration between their clients and employees. They came to Fastmetrics for our VoIP phone system. They have employees located across the country and needed a phone system that could work seamlessly in multiple locations. For the better half of a decade, we've provided a phone system that does that and more.

OUR ONGOING SOLUTIONS

Supporting an organization like this is not a "set it and forget it" scenario. Ensuring reliable connections and equipment performance is an ongoing effort from our team of qualified experts. From the very beginning, we've placed an emphasis on customer service, preventing issues before they occur, and resolving surprise problems as they happen. Evaluating customer satisfaction is where we set the bar for our success. We do not settle for less than the best.

NEVER SATISFIED

If you talked to customers like the people at Orinda Asset Management LLC, you would know that our team is not satisfied until the customer is. When Gladys S. moved to a new location, our team was there to bring out the new phones, set them up, and ensure they were operating at their best. We go above and beyond to guarantee the best performance for customer's communications and collaboration tools.
